Vorwort	5
NIXDORF, Brigitte	
Measuring primary production in aquatic Systems -new attempts to solve old problems	7
KRUMBECK, Hartwig	
Measurement of photosynthetic carbon fixation in aquatic Systems	11
KÖHLER, Jan	
Measurement of photosynthetic oxygen production	17
DAU, Holger	
Chlorophyll fluorescence measurements for assessment of primary production in aquatic ecosystems - the basics	23
ZIPPEL, Barbara	
Dilution-Methode - Möglichkeit der Bestimmung von Wachstum und Sterblichkeit durch Grazing in Planktongemeinschaften	41
DAU, Holger	
Photoacoustic measurements as a potential tool for assessment of primary production in aquatic ecosystems - the basics	47
HARTIG, Peter; LIPPEMEIER, Sebastian	
Comparison of photosynthetic measurements based on active fluorescence (PAM)-, O <sub>2</sub> - and <sup>14</sup> C- methods	51
FORSTER, Rodney Malcolm	
Experimental conditions accompanying the measurements of photosynthesis	59
SCHUBERT, Hendrik; FEUERPFIL, Peter, FORSTER, Rodney Malcolm	
The mesocosm approach for direct comparison of photosynthesis measurements based on active fluorescence (PAM)-, O <sub>2</sub> - and <sup>14</sup> C- methods	75

<b>DOMIN, André; FORSTER, Rodney Malcolm; HINTZE, Ralf; KÖHLER, Jan</b>	
<b>Comparison of different types of Chlorophyll fluorometers</b>	<b>81</b>
<b>KRUMBECK, Hartwig; OCKENFELD, Klaus</b>	
<b>Measurement of primary production in aquatic Systems by the     radiocarbon method</b>	<b>93</b>
<b>HARTIG, Peter; LIPPEMEIER, Sebastian; FORSTER, Rodney Malcolm</b>	
<b>Results of 14C- and O2 measurements in relation to     PAM-fluorescence measurements</b>	<b>101</b>
